6.30 am – 7 pm

Special dietary considerations

If you are on a diet that has special requirements, including preparation for a procedure, your menu choices may be modified or restricted. Our Room Service Representatives will assist you to make appropriate selections for your individual needs.

To assist you in making a healthier meal choice, there are symbols throughout the menu to indicate lower saturated fat/lower salt options – ♥, lower glycaemic index carbohydrate choices – GI, and carbohydrate serves – ❖1.

Gluten free options are available for many menu items – GF.

Please ask your room service representative when placing your order.

For patients with diabetes

If you follow a diabetes or consistent carbohydrate meal plan, it is recommended that you eat three well balanced meals a day, with carbohydrate serves similar at each meal from day to day.

If you are carbohydrate counting to match insulin to each meal, carbohydrate serves are indicated on the menu.

One carbohydrate serve – ❖1 = 15 grams of carbohydrate.

Monitoring blood sugars and administering medications must be timed with food intake in order to be most effective.

Please inform your nurse when you order a meal so they are able to monitor your blood glucose or administer your diabetes medication appropriately.
