

Celebrating International Women's Day

International Women's Day is...

An opportunity to celebrate and reflect on the impact women have in making a difference to our communities. It is an acknowledgment of the achievements we make, and a recognition that we all have something of value to contribute.

Embodying Mater mission and values

Showing compassion, respecting and celebrating diversity and genuinely caring and valuing those around us ensure that we can live the Mater mission and values in our every day work. These core qualities are at the heart of so many of our Mater staff, and I see these qualities transferred into our practice every day.

Female influences who have helped shape my life

My grandmother was a wonderful influence in my life. She was also a nurse and instilled her dedication to the profession within me. She was a hard working, warm and compassionate person who truly valued everyone around her.

Words of wisdom

Always have kindness in your heart and to look for the good in the people around you.

Tracey Hutley

Director of Clinical Services
Mater Private Hospital Brisbane
