September 2026

Emergencies

07 3163 1555

or

Ext. 555 (on a fixed phone handset only)

In the event of an emergency, please immediately phone Mater's internal emergency line. This number is also saved in your Ambassador phone.

An emergency may be medical (e.g. someone has fainted) or security (e.g. someone is threatening in their behaviour). The process is the same irrespective of the reason. Emergency codes below can also be found on the back of your Mater I.D. card

Orange	evacuation
Red	fire emergency
Purple	bomb threat
Black	personal threat
Yellow	internal emergency
Blue	cardiac arrest
Brown	external emergency
MET	other medical emergency

Visiting Hours

Across our South East Queensland hospitals, visitors are welcome between 8am and 8 pm daily, with a recommended rest period for all patients between 1 pm and 3 pm to ensure patients have adequate sleep and recovery. Rest periods are recommended, but not strictly policed.

The following hospitals have alternate hours to the times above:

Mater Mothers Hospital: 10am – 8pm with a promoted rest period between 1pm – 3pm

Annerley Road Private Rehab: 12pm – 8pm

Frequently Asked Questions

Cleaning / Spills

For cleaning requests, you can phone cleaners directly and ask that they attend (particularly in the instance of spills). **Please do not attempt to clean up spills yourself.** To prevent injury to others please stay with the spill and redirect traffic until the cleaners arrive.

Public hospital cleaners 3163 7665 or Ext. 7665

Private hospital cleaners 3163 1130 or Ext. 1130

Note: Stanley St separates the Public and Private sides

Complaints

Where possible complaints will be resolved with Mater staff at the 'point of service'.

For all patient/visitor complaints, compliments or feedback, please advise them to do a web search on "Mater Feedback". If the patient/visitor wants to discuss the matter immediately, please refer them to the nearest Main Reception in the relevant hospital.

Emergencies

07 3163 1555 or Ext. 555

In the event of an emergency, please immediately phone Mater's internal emergency line. This number is also saved in your Ambassador phone.

An emergency may be medical (e.g. someone has fainted) or security (e.g. someone is threatening in their behaviour). The process is the same irrespective of the reason. Emergency codes can be found on the back of your Mater I.D. card

Employment at Mater

Should you receive an enquiry about paid employment at the Mater, please provide the interested party with the Mater employment website: careers.mater.org.au

Interpretation Services

Mater's Cultural Diversity Unit offers interpretation services in situations where a patient's health could be adversely affected without accurate communication. These services are arranged via external agencies and at a cost to the relevant department. Interpreters are booked in advance (usually with 48 hours' notice). All interpreters must be accredited; unaccredited bilingual speakers (family, friends, bilingual staff and people without accreditation) may be used for simple day to day communication only.

Mater Interpreting Services can be contacted on 3163 8776 or Ext. 8776

Lift Faults

If a lift is malfunctioning or out of service contact Security on 3163 5000 or Ext. 5000 (For Public side of Stanley St) or 3163 1657 or EXT. 1657 (For Private side of Stanley St)

Lost Property

Should lost property be returned to you at the desk, or found on your travels please take the item/s to the security office outside the Duncombe building.

Luggage

We are unable to store luggage or personal effects of any kind due to security risks.

Maintenance or faults

Always report immediate health and safety concerns directly to the nearest staff base. For example, if you notice a water leak, or an electrical hazard, speak with staff in the nearest work area to the fault.

If you notice something that requires repair or maintenance and is non-urgent, report this to your Coordinator.

Mater Car Parking

There are a number of parking packages and options available for visitors to the Hospitals. Additional information on these options can be found in your Ambassador folder under *general information*, or via staff at either of the car parking booths located on level 4 Private Specialist Clinics building or level 1 Hancock Street carpark.

Patient Transport Service

This service provides free and responsive transport for Mater patients who are deemed "in need". Patients must meet a set eligibility criterion for use of the service. If you receive any enquires related to this service please refer the interested party to the Department they are dealing with. Each department conducts the necessary eligibility assessment and makes the booking as patients cannot book directly. This service is not available to friends or family members of patients.

Smoking on campus

Smokers need to be five metres off Mater campus to comply with legislation. Please be advised that Mater Security is not empowered to issue fines to smokers on campus.

Volunteering at Mater

If you receive an enquiry related to volunteering at Mater please advise the interested party to contact Volunteer Services by phone on 3163 8599 or go to our website: mater.org.au/group/careers/volunteering Only escort the interested party to the Volunteer Office (Kelly Building Level 3) if requested.

Wheelchairs

Please refer to the *Appendix 2: Wheelchair Handling Guidelines* for information about when to assist and how.

Appendix 1: Ambassador Guidelines

Role Expectations:

- Be stationed in front of allocated desk during rostered shift
- Greet and offer to assist each person
- Patients and visitors are to be escorted door to door in every instance (on Mater Campus and to nearby locations)
- Provide wheelchair assistance within your safe physical capacity
- Offer to assist patients and visitors with luggage
- Farewell patients, visitors & staff as they leave Mater Hospitals
- Volunteers may use their personal phones while on shift to access the Ambassador directory. Please do not use your phone for personal reasons during your shift.
- Books / magazines / study materials are not to be brought to the desk.

Practical advice:

- Clarify where someone needs to go before you set off. Ask to view the persons paperwork or text message reminder. Refer to your directory (see Resources for more information). Mater is a big place; we want to get it right the first time.
- Do not assume someone knows where they are going. People may look determined and then end up in a part of the hospital where there is no volunteer desk or staff support. By offering to assist everyone you provide the opportunity for people to ask questions if they are unsure of where to go.
- Think of some 'go to' talking points to engage people in conversation. If someone is not interested in chatting as you walk, that is okay too!
- Be mindful of privacy. Remember that in order to do your job you may need to ask questions (e.g. which department do you need to go to? what is your doctors name?) – these questions are appropriate to ask.
- Ask if they will need help after their appointment e.g. finding their way back to their car. Their parking ticket will have the location stamped on it. You can also give the person the location or phone number of their nearest Ambassador desk or leave the volunteer mobile number with clinic staff.
- Offer to help people as you travel the campus. People get lost anywhere on campus and may not know where to go for help e.g. offer to assist people waiting for lifts.

Resources:

Folders / Directory: White folders at each desk contain indexed locations by hospital building, as well as full department and doctors' lists. Familiarise yourself with these folders and the content inside. You can download this information to your phone.

Mobile Phone: Staff or patients may contact you via the mobile phone. Be professional and answer "Hello, Ambassador Desk Mater Private Hospital, this is John". **Please do not leave mobile phones unattended at desks.**

Notice Diary: These diaries are used to inform you of changes to department or clinic locations; reminders; events and other timely information for Ambassadors. At the start of each shift read through each notice that has been printed since you were last in. If there is something you need to tell your Coordinator, please speak to them directly.

Frequently Asked Questions:

Break Times: As a guide, for a three-hour volunteer shift we recommend a 10 to 15 minute break. However, depending on your personal circumstances please take a longer break away from the desk to rest your body. Please do not attend morning tea or lunch at the commencement of your shift. Ensure when possible that coverage of your desk is maintained during the break (i.e. one person to take a break while the other stays at desk).

Personal belongings: Your valuables must be left in the lockers in the Kelly building. Personal items have been stolen from the desks in the past.

Health and Safety: It is important to change your working position frequently and not stand in the one place for a prolonged amount of time. When standing at the information desk make use of the antifatigue mats provided. Remember constant sitting is not the safe alternative to constant standing. For cleaning and hygiene related issues, please contact Housekeeping (under Useful Information in Ambassador Folder / Directory).

Lost Property: Should lost property be returned to you at the desk, or found on your travels, please take items to the Mater Security office located beside Duncombe building.

Luggage: We cannot store people's luggage or personal effects of any kind due to possible security concerns. If you find any unattended suspicious items/packages in the hospital, please contact Mater Security.

Off Campus: You can escort patients and visitors off campus (e.g. to Queensland Children's Hospital or to the Southbank train station). When escorting someone off campus be mindful of how long you will be gone and ensure someone knows where you are going.

Patient / Visitor Complaints: Complaints

Where possible complaints will be resolved with Mater staff at the 'point of service'.

For all patient/visitor complaints, compliments or feedback, please advise them to do a web search on "Mater Feedback". If the patient/visitor wants to discuss the matter immediately, please refer them to the nearest Main Reception in the relevant hospital.

Shift Time: If you would like to arrive early or stay late please speak with your Coordinator before allocating yourself to a desk. You are expected to be at your allocated desk only for the duration of your shift unless arranged otherwise with your Coordinator. This is important as it affects the experience of other volunteers.

Wheelchair escorts: Volunteers are not to do wheelchair escorts outside the hospital buildings. Before offering to escort a patient in a wheelchair please be sure the patient isn't too large for you to push. You can request assistance from Ward Services with people too large to be escorted by you safely. Their assistance can also be requested if the person is unable to get in and out of the wheelchair independently. The number for ward services is in your phone. Please refer to the wheelchair guidelines in your Ambassador Directory for a complete list of wheelchair suitability and safety protocols.

Appendix 2: Wheelchair Handling Guidelines

Ministry and Work Area: Mater, South-East Queensland Campuses
Approved by: Dan Young (Senior Manager, Mater Volunteers),
Campus Coordinators

These guidelines are to serve as a helpful reference once formal wheelchair handling training has been provided to you by Mater Volunteers staff.

Duty of Care

All Mater people have a duty of care to transfer and transport patients safely every time. By following these guidelines, you will ensure the safety of yourself and the safety of the patient you are transporting. Prior to each use, the volunteer must ensure the wheelchair is fully functioning and complete e.g. no missing parts and has working brakes.

Patient Suitability:

In all instances, the following applies:

- ❑ Do not assist if you feel uncomfortable in any way e.g. weight of the person is greater than your comfortable physical capabilities. Our Ward Services staff will assist with these situations
- ❑ The person must be able to get in and out of the wheelchair unassisted. You may need to ask this before you agree to assist
- ❑ The person must not have any medical equipment attached to the wheelchair e.g. oxygen bottles or drips

Who we can assist

- ❑ Inpatients (admitted) that have been discharged to go home e.g. from a ward to the Transit Lounge or patients pick up location
- ❑ Inpatients (admitted) that are being taken to a location for recreational purposes authorised by nursing staff eg. being taken to a cafe
- ❑ Outpatients (not-admitted) being taken from a common area to any department e.g. foyer to Emergency Department
- ❑ Outpatients being taken from one department to another department e.g. Mater Cancer Care Centre to Transit Lounge

Who we can't assist

- ❑ Inpatients (admitted) in the wards being moved to another department e.g. patient being moved to another ward or taken to X-ray. Only Ward Services staff can transfer these patients

Procedure:

It is vital to your patient's safety that you keep the patient away from the chair until you've completed these three steps.

1. Put both brakes on
2. Got both footplate arms clear and footplates up
3. You are braced behind the chair

Once these steps are complete it is safe for the patient to sit down.

Upon arrival at your destination the same procedure is to be completed.

Safety tips:

When transporting patients;

- | □ Wheelchairs are not to be taken outside the hospital buildings except at a main entrance designated drop off zone
- | □ Internal wheelchair grade inclines must only be taken by confident volunteers who are transporting patients well within your physical capability. If unsure, do not attempt an internal wheelchair grade incline and contact Ward Services for assistance
- | □ Consider the load capability of the chair you intend to use e.g. standard or bariatric wheelchair
- | □ When passing through narrow passages or doorways ensure patients arms are not going to be hit
- | □ Ensure both the foot plates are down and locked into position. The patient's feet should be at all times resting properly on the foot plates
- | □ Leave enough room for the patient's feet and legs when manoeuvring the wheelchair around tight corners
- | □ If a wheelchair patient has travelled in by car, where possible it is safest to encourage the driver to bring the car to their patient's closest drop-off zone as opposed to taking the patient to their car

Internal Wheelchair Access Routes:

All routes start from the MHB L2 Ambassador desk

1. Salmon Building from MHB L2

(preferred route) Take MHB lifts to L4. Between the lifts and entry to Emergency is a door marked 'short stay unit'. Swipe in and walk down the corridor and through the final swipe access doors to enter the Salmon Building.

(via overpass) *This route is only suitable for confident volunteers with a patient suitably sized to your own physical ability due to the slight incline on the overpass across Raymond Terrace. If unsure, use preferred route above via MHB L4.* Proceed past McAuley's Café on L2 and take the covered overpass across Raymond Terrace to enter L2 of the Salmon Building.

2. Public Emergency from MHB L2

Take MHB lifts to L4. Access to Emergency is directly opposite QLD X-Ray. All patients must join the triage window queue.

Ambulatory Care Unit (ACU) is accessed by following the yellow dots that start at QLD X-Ray.

3. MCCC & Duncombe Building from MHB L2

Enter the Salmon Building (route 1). Directly opposite the Emergency corridor exit door you will see a swipe access glass door for the staff only lifts. Use these lifts inside to access L5A. On L5A, turn right and walk the linkway bridge across Raymond Terrace into MCCC.

For access into the Duncombe Building, once inside the MCCC doors take the second left and keep walking down the corridor, past the main reception desk and turn left to exit MCCC.

4. Mater Private Clinic, Mater Private Hospital & Mater Medical Centre from MHB L2

Take MHB lifts to L3. Use the linkway bridge across Stanley St entering L4 of the Private Clinic.

Take the Private Clinic lifts to L6 and follow the corridor until you enter the Private Hospital foyer.

Turn left at the Ambassador desk and walk past Chloe's café to enter the Medical Centre.

5. Mater Mothers Hospital from MHB L2

(via MHB L2) Mothers lifts are at the end of the corridor behind the MHB L2 Ambassador desk.

(via MHB L7) Take MHB lifts to L7 and follow the corridor past Pathology into L7 of Mater Mothers.

6. Hancock St Carpark (P1) from MHB L2

Where possible, it is safest to have the driver bring the car to the closest hospital drop-off zone instead of walking the patient in a wheelchair to their car.

The route to Hancock St is not accessible for any of the large wheelchairs. Call Ward Services for assistance.

Wheelchairs can only be taken as far as the VMO parking roller door on level 3 of the Duncombe Building.

Access the Salmon Building (Route 1) and then the Duncombe Building (Route 3). Take the lifts to L3 and follow the corridor. Walk across the open-air courtyard and exit into the VMO carpark. Exit via the steel gate near the roller door arriving at L3 of the Hancock St carpark. The carpark lifts are across the carpark on your right.

7. Whitty, Potter & Annerley Rd Rehab from MHB L2

This route is only suitable for confident volunteers with a suitably sized patient for your own physical ability due to the long internal ramp into the Whitty building. If unsure, do not attempt this ramp and contact Ward Services for assistance.

Take MHB lifts to L4. Walk through Emergency. Just before you reach the ambulance bay doors turn left. Go through the swipe access doors and up the ramp into the Whitty Building.

Continue past the lifts and look for the corridor on the opposite side of the glass atrium to enter the Potter Building.

For Rehab, keep following the main corridor. Turn right at the Potter lifts and walk past the Mater Education training rooms. The lifts for Annerley Rd Rehab are at the end of this corridor. For QDEC take the lift to L2. Access to the Eye Clinic is via L1, taking a right, then left to access the rear door of the Eye Clinic reception.

8. Radiation Oncology PA (ROPART) from MHB L2

Take MHB lifts to L3. Swipe to enter the staff only corridor opposite food services. The Salmon Building staff lifts are at the end of this corridor and the QRI lift button must be used to call the only lifts with access to L2A. L2A opens directly onto the treatment spaces at the rear of ROPART. Walk through the treatment space and take the lift up one floor for the main reception desk
