

Priority Pathways Project

Transforming care and growing capacity at Mater Private Hospital Brisbane

Mater Private Hospital Brisbane is investing in the future, with a \$70 million stream of new health infrastructure projects to expand our capacity and enhance our care.

We've consulted our specialists and clinical teams, and worked with leading technology and construction contractors, to deliver this exciting program of works.

Our Priority Pathways projects will be completed in stages throughout 2025–2026.

2025

August

New Coronary Care Unit

Mater's new and expanded 10-bed CCU will open on level 7 of Mater Hospital Brisbane and will include PIC 4 telemetry, enabling wireless monitoring of every cardiac patient's heart rhythms and electrical activity across the South Brisbane campus.

September

Ward 8 South refurbishment

The newly renovated inpatient ward on Level 8 of Mater Private Hospital South Brisbane will be inviting and contemporary.

September

New Cardiovascular Unit

Mater's new Cardiovascular Unit will be co-located next to the new CCU and equipped with the most advanced Siemens bi-plane and single-plan cath labs.

October

New ICU and Premium Suites

Located on level 8 of Mater Private Hospital Brisbane, our new ICU will enhance care for critically ill patients, while new premium suites will provide hotel-style comfort for medical and surgical patients.

2026

New operating theatres

The relocation of Mater's ICU will allow the construction of three additional new operating theatres on level 7, significantly expanding our surgical capacity.

New endoscopy suites

The relocation of Mater's CVU will enable the construction of two new endoscopy suites, further expanding our capacity to diagnose and treat conditions of the digestive tract and genitourinary system.
