

Visiting Medical Officer (VMO) – Printing at Mater on BYOD using Apple MAC

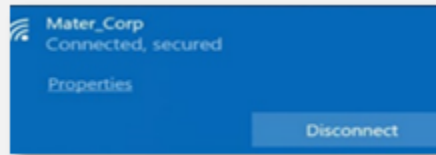

VMO's using a Bring Your Own Device (BYOD) will not be able to utilise the Follow Me Print secure printing available on Mater printers or to be able to swipe Mater ID/Building access cards to print. VMO's printing from a BYOD will need to follow the below steps, applicable to their device type (Apple Mac)

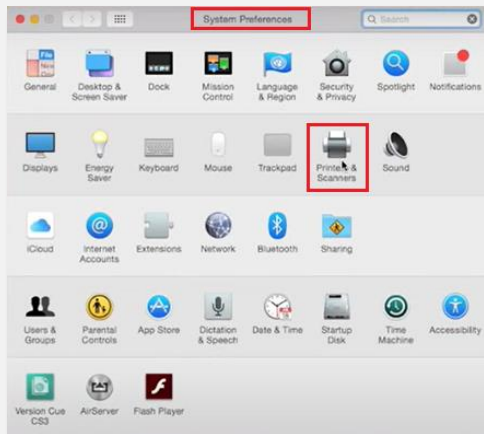

Step 1

- When on Mater premises connect your Apple MAC to the following wireless network.

SEQ **Mater_Corp**
CQ **Mater-VMO**
NQ **MaterNet – Doctors WiFi**

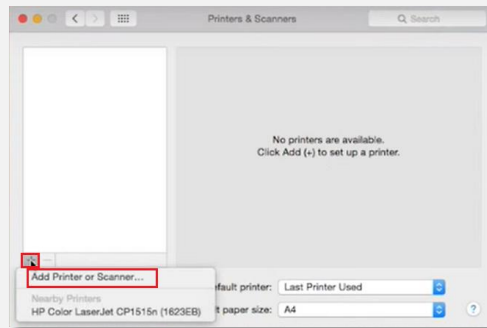

- Open **System Preferences** on your Apple MAC and go to **Printers and Scanners**.

Step 2

- Press the **+** button.
- Select **Add Printer or Scanner**.

Step 3

- Select **IP** from the top menu.
- In the Address field, enter the **Canon serial number** (located on a sticker on the printer) is follows e.g. 12345.mater.org.au.
- In the Protocol field, change protocol: to **HP Jetdirect – Socket**.
- In the Location field, type in a Description.
- In the Use field, change Use to **Generic PS Printer**.
- Press **Add** then press **OK**.
